---

The data can be converted to excel by first exporting it. Instructions on how to export the data can be seen here:

[http://www.objectplanet.com/opinio/userguide/raw\\_data\\_settings.html](http://www.objectplanet.com/opinio/userguide/raw_data_settings.html)

Once exported, you can import this data into excel. See Excel documentation of how to import data.

We also offer a plugin for purchase, that exports raw survey data directly to Excel.
